

Reading just became EZ-ier

For those who love the convenience of downloading ebooks and audiobooks to their personal electronic devices, the opportunity to sign on with two new vendors is underway.

The State Library of Kansas and the Abilene Public Library are pleased to announce the Kansas EZ Library of digital books available to all Kansas library users. Acting on behalf of Kansas libraries, the State Library of Kansas has entered into agreements with OneClickDigital (for downloadable audiobooks) and 3M (for downloadable eBooks).

OneClickDigital for audiobooks is available via the State Library of Kansas and the Abilene Public Library. Books can be accessed at this site www.kslib.info/digitalbooks. Users must have a Kansas Library card that can be requested at the Abilene Public Library.

Regular users of the download service will find the new interface with OneClickDigital much simpler and faster to use. Video and written tutorials are available at www.kslib.info/digitalbooks to assist individuals in using the new service.

In addition, the State Library will begin offering an ebook solution through 3M Cloud Library soon. Updates for the beginning of this service can be found on the www.kslib.info/digitalbooks site. The Kansas EZ library page also features other free audiobook and ebook resources available to Kansas readers.

On Dec. 5, Kansas ended its six-year contract OverDrive, a source for downloadable books. The books previously available for checkout through OverDrive and possibly on hold for patrons will no longer be accessible. However, thanks to the diligence of the State Library, many of the titles popular with customers have been transferred to the new vendors' platforms, and now are available through the two new services.
